

Scott Sims, UDK ~ Large Loss Estimator

Scott began work in the Restoration/Reconstruction industry specializing in asbestos abatement in 1988. He has successfully completed hundreds of residential, commercial, and industrial abatement and restoration projects throughout multiple states throughout his career. Scott transitioned into catastrophic damage assessments with the Northridge Earthquake of 1994, and managed Residential and Commercial losses as a “Construction Analyst” for the SBA. When Scott moved to Utah in 2000, he combined these two disciplines and began mastering insurance-based property restoration work. His expertise includes Mold, Asbestos, Environmental issues, Water Mitigation/Dry-out, Fire Restoration work, and Residential/Commercial construction.

In 1988 he earned the Contractor/Supervisor in Asbestos (AHERA). In 2012 Scott earned his Certified Restorer (CR) credential from the Restoration Industry Association (RIA). Mr. Sims has also received Lead Certification (RRP), Certified Restoration Technician (CRT), Water Loss Specialist (WLS) and Advanced Structural Drying (ASD). He earned both the Water Restoration Technician (WTR) and the Commercial Drying Specialist (CDS) credentials from the Institute of Inspection, Cleaning, and Restoration Certification (IICRC). Mr. Sims attends industry conferences and training events to maintain his knowledge and skills and stay on top of the latest trends.

- CR – Certified Restorer - RIA*
- FLS - Fire Loss Specialist - RIA*
- CDS – Commercial Drying Specialist - IICRC*
- WRT – Water Restoration Technician – IICRC*
- CRT – Certified Restoration Technician – RIA*
- AHERA – Asbestos Hazard Emergency Response Act*
- ICRA-Infection Control Risk Assessment*

Within the evolving health care marketplace, Scott pursued becoming ICRA certified, and later, an ICRA certified trainer. His focus and attention to detail has allowed him to become a mitigation and restoration consultant and provider for the largest health care network in Utah. He manages several projects in hospitals, clinics, labs, and care facilities along the Wasatch Front each year.

Scott has been a trainer for Mold and Asbestos work, as well as spending time in an advisory capacity for the State Legislature. He has worked closely with large Institutional Organizations for Emergency Preparedness planning. Scott is just one of the valuable employee assets available to you at UDK.
